PROFILE

Product designer with 4+ years taking digital products from discovery to dev handoff, across finance, healthcare research, data security and beauty tech. I lead research, turn complex or sensitive flows into simple ones, and work closely with product and engineering to ship.

EXPERIENCE

Product Designer / Zemingo (2022 - 2026)

- Led end-to-end design of mobile and web products for enterprise and startup clients, from discovery to high-fidelity UI and developer handoff.
- Planned and ran user research, including stakeholder workshops, in-depth interviews and usability tests, and turned findings into personas, journeys and design decisions.
- Built and evolved design systems and component libraries, keeping UI consistent across products.
- Partnered with product managers and developers to balance user needs, business goals and technical constraints, and ran design QA before release.
- Mentored and onboarded design interns and junior designers through reviews and hands-on feedback.

Art Director / Grey Group (2021 - 2022)

- Designed large-scale online and offline campaigns focused on customer solutions and satisfaction.
- Adapted campaign concepts across screens, formats and media platforms, from digital to print.

EDUCATION

2017 - 2021

B.A. in Visual Communication
Shenkar College of Engineering, Design and Art

MILITARY SERVICE

2014 - 2016

Jet Engine Technician, Israeli Air Force
